PROFESSIONAL SUMMARY

QA Engineer with 4+ years combining manual and automated testing on a SaaS logistics platform in Agile/Scrum environments. Designs comprehensive test plans, executes structured manual, regression and exploratory testing, and maintains automated suites in Playwright (TypeScript) integrated into CI/CD pipelines. Validates APIs and UIs end-to-end, catching ~25% of releases with defects before they ship, while building AI-powered QA agents for consistent, auditable test design.

TECHNICAL SKILLS

Test Planning & Execution: Test plans, detailed test cases, manual testing, regression testing, exploratory testing, smoke testing, edge-case analysis, risk analysis

API & UI Validation: Postman (API automation & validation), Playwright (TypeScript), Selenium, Cypress, Appium, end-to-end UI testing, cross-browser testing

Test Automation & CI/CD: Playwright (TypeScript), Selenium, Pytest, JMeter, K6, automation framework design, CI/CD pipeline integration, Git, GitHub, Docker

Defect Tracking & Documentation: Jira, Xray, TestRail, Zephyr, Azure DevOps, Notion, Jam.dev, defect lifecycle management, clear documentation

Test Design: ISTQB techniques (Equivalence Partitioning, Boundary Value Analysis), Gherkin (Given/When/Then), acceptance criteria writing, requirements analysis

AI for QA: AI testing agents, Claude Code, LLM-assisted test design, prompt engineering

Programming: Python, TypeScript, JavaScript, SQL

Databases: PostgreSQL, MongoDB

Methodologies: Agile, Scrum, Kanban

PROFESSIONAL EXPERIENCE

QA Engineer

Simpliroute | January 2022 - July 2026

- Designed comprehensive test plans and detailed test cases from system requirements and user stories, writing scenarios and acceptance criteria in Gherkin and keeping plans ready for ~90% of features before development started.
- Performed structured manual, regression, and exploratory testing on a SaaS logistics platform, validating 3-6 features per week across API endpoints, web UI, and mobile interfaces with a one-day average turnaround.
- Validated API endpoints and user interfaces end-to-end, uncovering edge cases in third-party integrations and complex routing business rules, blocking ~25% of tested tasks from release with documented defects.
- Tracked, documented and managed defects through their full lifecycle using Jira and Xray, collaborating closely with developers and PMs under Scrum to ensure timely resolution.
- Developed and maintained automated test scripts in Playwright (TypeScript) over three years, integrated into CI/CD pipelines triggered on deploy tags, plus API automation in Postman and mobile automation bootstrapped with Appium.
- Built AI-powered QA agents that compare pull requests against test plans and assess automation scope, applying reusable ISTQB-based skills for consistent, auditable test design.

EDUCATION

Systems Engineering | Universidad Tecnologica Nacional (UTN), Santa Fe, Argentina | In progress

PROFESSIONAL DEVELOPMENT

Mastering Playwright with TypeScript | Udemy | March 2025

Selenium with Python and Pytest | Free Range Testers | August 2026

LANGUAGES

Spanish: Native | English: Advanced (B2+)
